How To Make Money Online Tutorial

By Mel Lancaster of <http://www.online-money-1.com>

The goal of online money is to help it's loyal visitors, make extra money.

We've all heard the stories of the woman, that makes **\$3000** a day, or the teenager, who's websites sold for **\$100,000's**. What about the single mother, who quit her 9 - 5 job, and now earns over **\$10,000** a month online. We've all seen these self same stories, day after day online.

Are these stories true?

Or just a load of made up trash, to suck us in for a sale?

The truth is we don't know, for sure. But haven said that, it's quite easy to spot scams, or false claims. Just take a look at the picture below:

We want to believe that we can, start making £150 in 25 minutes. Risk-free and completely legal! But the likely outcome, with this along with other get rich quick schemes is; we end up out of pocket. You have to ask the question, if they are making this much money with there systems.

Why do they need you to purchase it?

Nothing In Life Is Entirely FREE!

You probably don't want to here this. But the people who become rich online, are the people who put the most time and work into there projects. You have to treat, your time online as a business, if you want to earn any serious amounts of money.

Most people just look to make money. But don't focus on how. This is the biggest fundamental mistake, you can make.

There is no get rich quick scheme, I've heard of, that works. Well at least, the way they promise you.

But there are people who get rich, using some of these schemes. Mostly people that work harder than anybody else, they make these schemes work. Not because of the (scheme) but the time and the energy that they consume, to make it a success.

But even this doesn't happen over night, like they'd have you believe. It takes a long time.

Put the time and effort, into most things, then you will start to reap the rewards.

What You Need To Make Money Online

(1) Bank Account, enables you to transfer your money to your account.

(2) Paypal Account, for online money transfers and safety. Paypal is trusted.

(3) Visa or Master Card, To use with Paypal and all other online purchases.

Don't worry if you haven't got a Paypal account or Visa Card. Just look on the Online Money Home Page for the details. They will be in the bottom left box.

That's basically it.

How Much Are You Going To Earn?

Well to answer that one correctly, I'd have to be some kind of wonder psychic. Fortunately, there is a lot you can do, to determine your online earnings. Here's a couple of examples:

Paid To Post Forums

What is a paid to post forum?

A paid to post forum is a website, in which you get paid, to share your thoughts.

Each forum pays money for each post you write.
You also make money for referring friends or other like minded people.

This is simple to work out.

You simply work out how many posts you are going to post and * it with how much each post is worth.

There are good methods you can use, to maximise your earnings, with paid to post forums. But more about that latter.

ADSENSE

Over time you can quite accurately, work out your approximate earnings. This is done by understanding CTR (Click Through Rate) number of people clicking Adsense ads per 100 impressions.

e.g. Say I own a website, that gets on average 2000 Adsense impressions a day. The CTR for this website is 2.5 and the average click is worth \$0.14.

That means, this website gets:

50 clicks a day.

\$7.00 a day.

\$49.00 a week.

Remember this is just an example, but you would have to work pretty hard, to get to that \$49.00 a week.

That is why I cannot stress enough, that it's through hard work and determination. You will become successful.

Don't worry if you haven't got a website, and you don't know how to go about getting one. You can make money online with or without a website. Plus if you want your own website.

Online Money provides its loyal visitors. With an easy to follow, step by step tutorial. That walks you through the process of gaining your own website. Like I keep on telling you, to be successful, you have to put the miles in.

Besides, it's easier than you think.

Treat Your Time Online Like A Business.

Stay in control and use your time wisely. Always try and know what you have planned, that day. The better organized you are, the clearer your goals will become.

The reason you need to be organized is! Because, earning money online, is more than just relying on one system. You need lots, all going at the same time. It's know good just relying on forum posting or AdSense.

You will only make a very small amount.

But if you put them together, your earning opportunity greatly increases. These two (Adsense and Forum Posting) fit together well, believe it or not. Adsense takes a couple of minutes to install, on any website page, and is then automatic.

Leaving you time to focus on forum posting or other online money making activities. The more systems you have going the more money you are likely to earn.

Website Diary *Success Challenge*

The success challenge is something new.

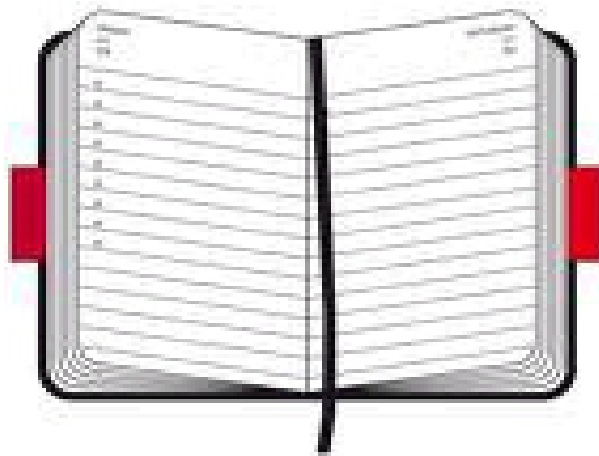

Why should you take my word, about anything that I have written, on this website. The proof is in the pudding, or so they say.

That's why I'm going to walk the walk. Meaning that I'm setting up a website diary, starting the **8th March 2009**. I'll be showing you, that I practice what I preach.

All the online money topics talked about on this site. Paid per post, AdSense etc.. I'll be participating a new, starting from scratch (\$00.00) like you. And post in my diary the results, how much per day or per week I've earned. And what activities I've done to earn online money.

This I believe makes it easier for you to see if something works or not. Because you can see the results, in front of you.

Look for the (Website Diary ***Success Challenge***) and see what really works online.

Now It's Your Turn

Have a look at my website diary ***Success Challenge*** and on the Online Money website. Find out, what the best online money making opportunities are, then make a plan of action, sharing your available time between the different opportunities.

As your knowledge and confidence grows, you can add to your plans.

As your plans grow, so to will your online revenue.

Remember! Start from the bottom, work your way to the top.

Investing In Yourself

Very important message, if you are starting from scratch ZERO finance.

Then when you start earning money online, you need to reinvest some of it back. So that you can increase your earning potential.

e.g. If you haven't got a website, you could get one. This means not only investing some of your money. But also some of your time, reading a tutorial, and following the instructions. The result will dramatically increase your online earning potential.

So invest in yourself. **(NOW GET STARTED)**
